

Axis has been working with large financial and healthcare institutions, like Fidelity Investments, Partners Healthcare, and Captial Group, to implement masking solutions since 2004. The Axis Masking Service Package for 200 Applications is designed to provide clients with a large-scale approach to masking their inventory of applications.

What is Covered?

- **Interviews:** Axis interviews up to (5) key client stakeholders to understand the sensitive data landscape
- **Security Policy Configuration:** Implement the existing corporate security policy in the Delphix Masking Profiler
- **Application Profiling:** Axis will profile the 200 applications and validate the results with the client
- **Application Masking:** Axis will mask up the 200 applications and get customer signoff
- **Custom Algorithms:** Axis will develop up to (1) custom algorithm if needed
- **Deployment Report:** Axis will document what was accomplished, lessons learned and recommended next steps

Details

The Delphix Masking - Service Package for 200 Applications is a fixed-price engagement based on the number and size of your databases and can be customized to handle larger-scale environments

Each application is one fully deployed environment (e.g. SIT, UAT). Applications are assumed to have no more than 1-3 databases/schemas and 1-10 files.
