

GDPR, Privacy by Design, and by Default is one of the key requirements of GDPR. Implementing a data protection solution for non-production environments using data masking meets this requirement. It provides a mechanism to ensure that real personal data is not processed in non-production environments.

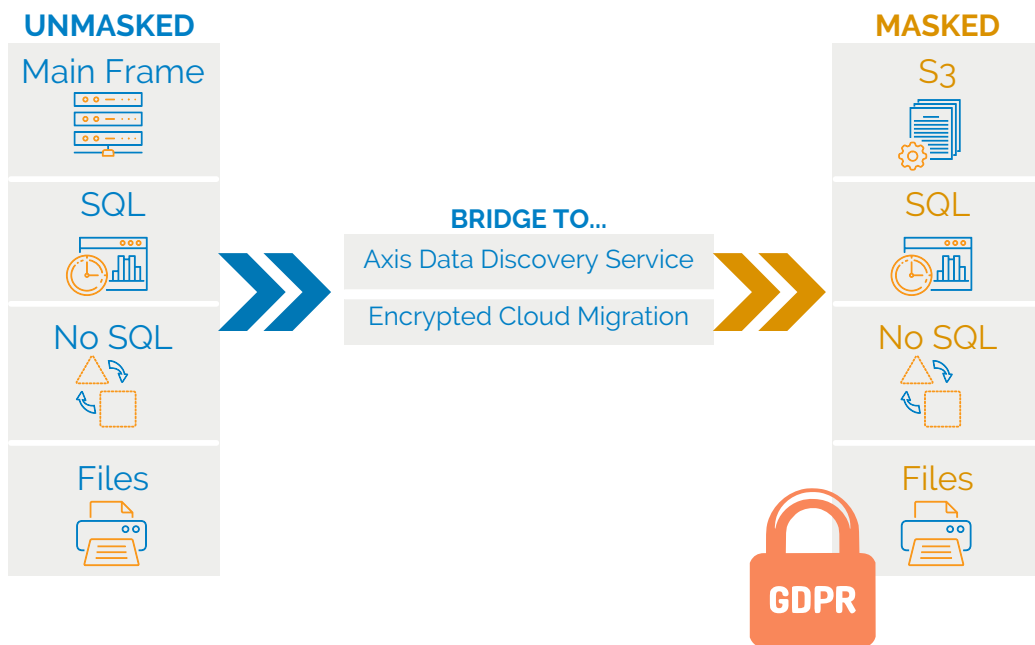

What's Included

The GDPR Data Protection solution is a fixed price engagement that includes the following:

- GDPR Assessment
- GDPR Masking Factory (e.g. 200 applications)
- Annual GDPR Managed Service
- The Axis GDPR Solution can be customized to handle larger-scale environments as required

What is Covered

- **GDPR Process Design:** Define the roadmap to implement Privacy by Design using data security
- **GDPR Data Protection:** Use Delphix Masking to mask personal data in non-production environments, creating a repeatable masking process
- **GDPR Right to Be Forgotten Data Protection:** Implement a custom, configurable Right to Be Forgotten solution across your data environments
- **GDPR Technical Support Service:** Maintain and support GDPR compliance
